Performance Research Cockpit

User Guide

An AI-guided research training cockpit that teaches and structures responsible compliance and business research. A luxury instrument cluster reads your work at a glance, with human review built in at every step.

**Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.**

Performance Cockpit

Command Center

The Performance Cockpit is your daily dashboard. A cluster of circular gauges reads out the health of your research at a glance, with live tiles below for everything in motion.

WHAT YOU CAN DO

- Instrument gauges for source quality, report readiness, research velocity, and human-review risk.
- Live tiles for open requests, blocked items, reports in progress, and completed handoffs.
- Today's priorities, review alerts, and quick actions to launch the most common tasks.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.

Research Engine

Guided Research Builder

Every project fires up here. Scoping the question before involving AI is what keeps the rest of the workflow disciplined.

WHAT YOU CAN DO

- Define the decision the research supports.
- List the sources the work requires.
- Record what must never be assumed, and flag requests that need human review.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.

Track Map

Research GPS

The Track Map guides you through the full workflow, from understanding the question all the way to a clean handoff, with a progress gauge to keep you on the racing line.

WHAT YOU CAN DO

- Pick an active mission and drive through each step in order.
- Mark steps Complete, In Progress, or Needs Help.
- Your progress keeps the cockpit gauges and counts accurate.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.

Source Garage

Source Vault

The Source Garage is where evidence is stored and rated, so trust is never assumed.

WHAT YOU CAN DO

- Official and internal records are treated as trusted.
- AI drafts and unknown sources are clearly flagged.
- A risk banner warns when a request relies only on unverified sources.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.

Brief Builder

Report Builder

The Brief Builder assembles a leadership-ready report and scores how ready it is to share.

WHAT YOU CAN DO

- Capture the objective, executive summary, findings, risks, and recommendation.
- Attach the sources that back each finding.
- The readiness score warns you when official sources or answers are missing.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.

Company Brain Sync

RoseOS

RoseOS is the company brain and your research co-driver. Ask it what is on record, and propose updates that remain drafts until a human approves them.

WHAT YOU CAN DO

- Query the decision log, requirements registry, and automation registry.
- Draft proposed updates to core records.
- Nothing is recorded automatically — every change requires human review.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.

Garage Rewards & Driver Training

Growth & Rewards

As you work, Garage Rewards turns real research skill into points and badges, and Driver Training builds the skills behind them — both tracked on their own gauges.

WHAT YOU CAN DO

- Points and badges reflect genuine research milestones, from Source Finder upward.
- Driver Training builds skills in using AI responsibly and verifying sources.
- A level gauge and roadmap show how close you are to the next milestone.

HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.
Company decisions are never recorded automatically.
