# Research Command Center

---

## User Guide

An AI-guided research training cockpit that teaches and structures responsible compliance and business research, with human review built in at every step.

**Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.**

# Command Center

The Command Center is your daily cockpit. It surfaces live counts so you always know where work stands the moment you sign in.

## WHAT YOU CAN DO

- Live tiles for open requests, blocked items, reports in progress, and completed handoffs.
- Today's priorities and any sources still awaiting human review.
- Quick actions to jump straight into the most common tasks.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.

# Research Builder

Every project starts here. Scoping the question before involving AI is what keeps the rest of the workflow disciplined.

## WHAT YOU CAN DO

- Define the decision the research supports.
- List the sources the work requires.
- Record what must never be assumed, and flag requests that need human review.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.

# Research GPS

The Research GPS guides you through the full ten-step workflow, from understanding the question all the way to a clean handoff.

## WHAT YOU CAN DO

- Pick an active mission and move through each step in order.
- Mark steps Complete, In Progress, or Needs Help.
- Your progress keeps the dashboard counts accurate.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.

# Source Vault

The Source Vault is where evidence lives. Every source is captured and rated so trust is never assumed.

## WHAT YOU CAN DO

- Official and internal records are treated as trusted.
- AI drafts and unknown sources are clearly flagged.
- A risk banner warns when a request relies only on unverified sources.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.

# Report Builder

The Report Builder assembles a leadership-ready report and scores how ready it is to share.

## WHAT YOU CAN DO

- Capture the objective, executive summary, findings, risks, and recommendation.
- Attach the sources that back each finding.
- The readiness score warns you when official sources or answers are missing.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.

# RoseOS

RoseOS is the company brain. Ask it what is on record, and propose updates that remain drafts until a human approves them.

## WHAT YOU CAN DO

- Query the decision log, requirements registry, and automation registry.
- Draft proposed updates to core records.
- Nothing is recorded automatically — every change requires human review.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.

# Growth & Rewards

As you work, the Reward Center turns real research skill into points and badges so you can see your career progress.

## WHAT YOU CAN DO

- Points and badges reflect genuine research milestones, from Source Finder upward.
- The Training Academy builds skills in using AI responsibly and verifying sources.
- A roadmap shows what each level represents.

### HUMAN REVIEW REQUIRED

Compliance guardrail: AI output is a draft only until it is source-checked and human-reviewed.  
Company decisions are never recorded automatically.
